

The First Principle of Safe UFO Summoning

Hardly anyone wants to summon their 'full and genuine Selves.'

Rather they generally want to summon something like 'God' or 'Angels' or 'UFOs' so that they can 'run away from their boring old lives. Hypothetical things that they don't understand, so they could wind up with almost anything.

This is why they get into trouble.

However, their 'full and genuine Selves' is the single most exciting thing they could possibly experience,

And the safest.

Summoning anything else is madness, unless they first know and live as their 'full and genuine Selves', in other words are WHOLE, as smeared across and beyond space and time.

And yes, their 'full and genuine Selves' can bring along a 'UFO' if they desire that.

Selves, not 'Self' is the key word here; as everyone is part of a Larger Life, composed of many Selves, not one static and unchanging little self.

Believing that you are just one weak, little, trapped 'self' is the cause of most human psychological and emotional pain.

But keep in mind, once you crack the door open, that has been hiding your true potential, it's hard to go back and be ordinary. There generally is no 'turning it off'.
