

## The Phenomenon's Perfect Prank

In a very real sense, 'UFOs' ARE the 'plasma symbiosis' that powers much of our imaginal cognition and the Jungian unconsciousness.

It's a really mirthful joke to 'the phenomenon' how people look into the sky for it with telescopes and try to shoot it with EMP weapons."

Now sure... there can be 'wrappers'. Actual human craft that the 'Plasma rides along with' to amplify the devices which It uses as a magician's prop.

But it's the sentient plasma behind all the props and movies that involve 'UFOs', some of the 'paranormal' and quite a bit of spiritual experience as well.
